TO: Minerals File

FROM: Lynn Kunzler, Senior Reclamation Biologist *LK*

RE: Site Inspection, Bonneville Quarries, Inc, Dove Creek Mill, S/003/047, Box Elder County, Utah

Date of Inspection: September 17, 2003  
Time of Inspection: 11:00 am.  
Conditions: Cloudy, cold  
Participants: Lynn Kunzler, DOGM

**Purpose of Inspection:** To document site conditions while in the area

**Observations:**

This site has been inactive for nearly four years. The only activity that has occurred on site during this time is reclamation (removal of equipment and waste rock). Reclamation has not yet been completed at this site. There has been no activity at this site during the last field season.

Tasks that need to be completed for reclamation include removing an old 933 track loader, and waste rock. The waste rock needs to be buried or removed from the site. The disturbed area then needs to be ripped to eliminate compaction and seeded with a permanent seed mix.

Several photos were taken to document site conditions.

**Conclusions and Recommendations:**

A letter should be sent to the operator reminding him of the need to complete the reclamation at this site so that we can close this file.
